Employment Process Flow Considerations

Step in the Employment Process	Action(s)	Documentation/Communication	Person(s) Responsible
• **Determine who the next job seeker(s) will be to go through the job placement process?** ○ How many people currently supported by the organization have an employment goal in their plans? How are you tracking this? ○ How will you assess outside referrals to determine if you have the capacity to support them? ○ How might you prioritize internal vs external referrals? ○ How and to whom are internal employment referrals made? ○ Will you have the capacity to accept outside referrals while you support people internally? ○ How will you handle any potential 'wait list'? ○ What person centered planning tool can be used in day services to assist in these referrals? (example: positive personal profile) ○ How will you determine if the job seeker needs a customized approach to employment vs. job placement/supported employment? ○ What is your intake process for employment?			

• **Discovery/exploration (20-60 hours)** ○ Home visit/observation ○ Gathering of the team (explain employment process, timeline and what to expect) ○ Interviewing people that know job seeker ○ Community mapping ○ Work history, documentation and file review ○ Identification of emerging themes ○ 2-4 Community exploration activities (based on profile) ○ Informational interviews ○ Refer to benefits counseling if appropriate ○ Explore all transportation options ○ How are people spending their day when not engaged in job search? (will they have access to community?) ○ Open VR case?	•		
• **Job Development** ○ 30 day placement plan created with specific action items based on profile ○ Specific action items and assignments aligned with interests, preferences and strengths ○ Focus on use of network contacts to set up informational interviews ○ Who will be doing informational interviews? How will you track these? (a from, a tracking system?) ○ Family and residential ○ How many informational interviews will occur each quarter? ○ How many VR billable hours will be expected by each developer?			

• **Job Negotiation and Placement** ○ Outlines how the employer's needs can be met by a particular job seeker ○ Highlights strengths of job seeker ○ How job match can be supported (natural and paid supports) ○ Includes proposed job tasks ○ Make the ask			
• **Placement and Support** ○ Prep for first day of employment (paperwork, uniform, transportation, etc.) ○ Foster and facilitate natural supports ○ Create an employment support plan ○ Identify long-term supports needed ○ Earnings properly reported to SS ○ What tools will you use? ▪ Task analysis ▪ Systematic instruction ○ What kind of tracking will you use?			
• **Wrap-around community life engagement supports:** ○ For people not yet in CIE, how will you support people in community life engagement? ○ How might Discovery inform this? ○ For people not working full time, does the person want/need additional wrap-around support to make a meaningful week in the community? ○ What skills can you help the person gain? ○ How will day/employment coordinate on weekly scheduling? ○ How will day/employment coordinate on learning happening in CLE and who might be next on a employment caseload?

Rethinking What Works

Quality Considerations			
• How might you pilot your process in order to engage in quality assurance and enhancement?			
• How will you talk to people, families, case managers differently about the job placement process?			
• Does your org chart support your process?			
○ Who is accountable?			
○ Does your structure need to change to support a different model?			
○ Do job descriptions support your goals?			
○ Who is managing the employment process?			
▪ Does this person have a solid understanding of the employment process in order to mentor and support employment team?			
▪ How will you build in succession planning into your job descriptions to ensure knowledge isn't lost with turnover?			
○ Can you build in a career ladder for staff?			
▪ Job coach			
▪ Discovery/Job Development (can this role be mentoring job coaches so they are learning other skills?)			
○ What (if any) other positions are needed?			
• What policies may need to be reviewed and updated?			
• **How will you determine reasonable caseloads for employment staff?**			
○ How and why might you shift caseloads over time?			
• **What are your metrics:**			
○ How many people with be employed and by when?			
○ What else will you be tracking? ▪ Employment process steps and time spent in each? ▪ Caseload movement ▪ Time spent in integrated settings? ▪ Volunteer hours?			

○ How will you measure quality?			
○ How will you make data-driven decisions?			
○ How will you measure dual customer satisfaction?			
○ With whom and how often will you share data?			
• **How might you:** ○ Emphasize goals rather than processes ○ Hold CLE supports to clear expectations and guidance ○ Expect CLE to lead to or complement employment ○ Use data to guide continuous improvement
