The Role of the Admissions Process

Addressing Risk through Admissions

You learn a lot and collect a lot of data

- Students
- Families
- Assessments and IEPs

The more you know

- Can mitigate risk
- Can open you up to risk

Structure the process with risk in mind

Case Study

Document your feelings out of the process

Documentation is key

- Missing Information can be identified
- Observations can be reinforced
- Remove your feelings from the admission process

Case Study: AKA Why we are having this webinar

“We do not evaluate any other student this much during an admissions process.”

The Role of Risk Management

They are your friend

Key support

- During program development
- During program crisis
- Will point out things you do not think about
- Back up inclusive practice when they have buy-in

Examples of partnership

- Review material
- Housing
- Campus activities
