

**CrossingPoints Certificate in Occupational Studies (CCOS)
Student Learning Outcomes (SLOS)**
(Excerpted from the Evaluation Section B of the UA New Program Proposal, 2018)

Student Learning Outcomes: *What do you expect students to be able to do after successfully completing the certificate program? Succinctly list at least four (4) learning outcomes, but no more than seven (7).*

Certificate SLOs

Students in academic enrichment courses will successfully complete their individualized goals by earning a course grade of “C” or better as measured by the Satisfactory Academic Progress (SAP) rubric (see attachments).

Students will demonstrate knowledge of skills for independent living in CPP 312 by successfully completing a portfolio assessment demonstrating their understanding of critical skills for living independently to include: financial management, transportation, agency awareness, and options for living independently and the necessary decision-making. The portfolio assessment will utilize a rubric that takes into account mastery of key elements of living independently as learned in previous courses related to independent living.

Students will demonstrate capacity for wellness and socialization in CPP 267 and CPP 268 by correctly completing chapter scenarios and receiving a rating of Satisfactory as measured by a rubric drawn from the Positive Choices curriculum.

Students will gain practical experiences in performing essential skills related to their chosen careers in inclusive settings by receiving an overall average rating of 3 or better as measured by an Employer Satisfaction Survey and Self-Assessment Scale.

Evaluation and Assessment: *Describe the process to determine whether or not the certificate program is meeting both the Expected Program Outcomes and the Expected Student Learning Outcomes (SLOs). Include outcomes, methods, and timing of assessments, using a format consistent with the current format used by the office of the Director of Institutional Effectiveness and/or your college’s assessment officer.*

SLO #1 - 80% of the students enrolled will earn the expected "C" or better as determined by the SAP rubric.

SLO #2 - 80% of the students enrolled will complete the portfolio based upon the provided rubric that includes artifacts that serve as evidence of increased independence.

SLO #3 - 80% of the students enrolled will correctly respond to the scenarios provided in their curriculum text, demonstrating increased ability to make appropriate wellness and socialization choices.

SLO #4 - 80% of the students enrolled will earn the expected rating of 3 or better as measured by the Employer Satisfaction Survey and Self-Assessment Scale.

At the end of each semester program faculty will meet and review the data provided by the various reporting sources in order to make data-informed decisions regarding any needed changes in the program. However, during the semester, if situation arise of student issues, program faculty will provide support for the student(s) to allow them to meet the performance level expected.
