

Day Support Services

5.22.23

Introduction

This document serves as a resource to help Minnesota's HCBS providers understand DHS's vision for day services and employment so they can develop, transform, and offer services accordingly.

DSD's vision for people

People with disabilities live, work and enjoy life in ways that are most meaningful to them and are valued, integrated members of their communities.

We achieve this by promoting an individual's control over their own life and advancing CHOICE outcomes.

- **Community inclusion,**
- **Health, wellness, and safety,**
- **Own place to live,**
- **Important relationships,**
- **Control over supports, and**
- **Employment.**

DSD's vision for day support services

Minnesota's [day support services](#) build **meaningful days** that help individuals create enriching and inclusive lives, that advance their CHOICE outcomes.

Offering someone a **meaningful day** means helping people grow and maintain life skills with experiences that help them realize who they are, what they are capable of, and how they can connect with other people in the community.

Day support services shall:

- be person-centered,
- promote community membership and participation,
- facilitate skill building and relationships,

- be outcome oriented.

Day Services and Employment

In alignment with [Minnesota's Employment First Policy](#), the Minnesota Department of Human Services believes that people with disabilities, regardless of level of disability, can be competitively employed and should be fully integrated into the workplace.

Employment brings substantial benefits and has unique importance for many people and their communities. As such, competitive employment is the first and preferred outcome of Minnesota's HCBS waiver services.

Employment, however, is not an exclusive or complete strategy in building a meaningful life and creating inclusive communities.

Day services can "wrap around" people's employment, supporting community life engagement outside of work hours. Day services can build skills and confidence that a person uses on their employment path and that can support making informed choices about employment. Day services can also support those who choose not to pursue employment. For more information about Minnesota's Informed Choice Policy see: [Sec. 256B.4905 MN Statutes](#)
