What do we know about supporting jobs over time?

Supports while employed

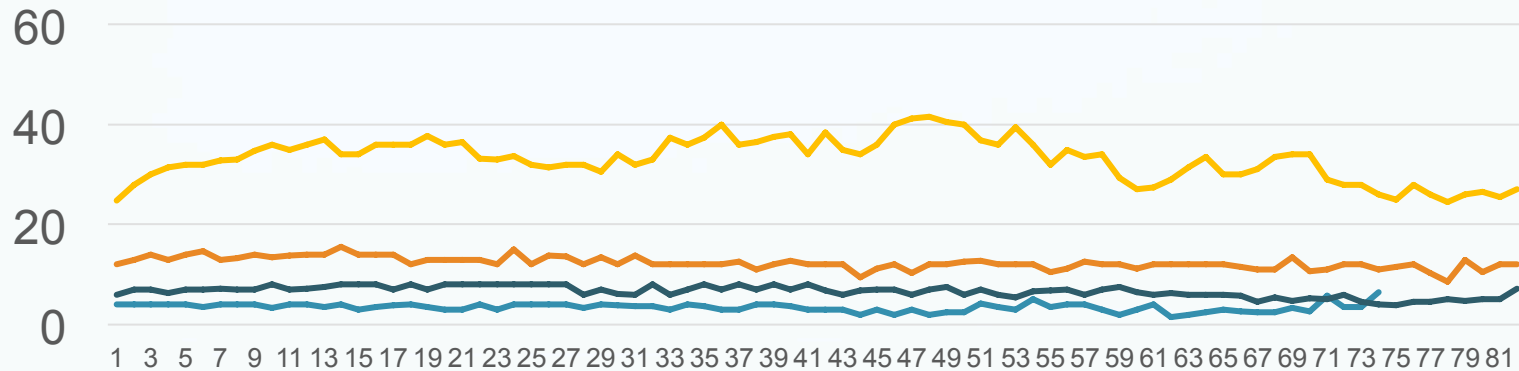

Ratio of Hours Worked to Job Coaching Hours Provided

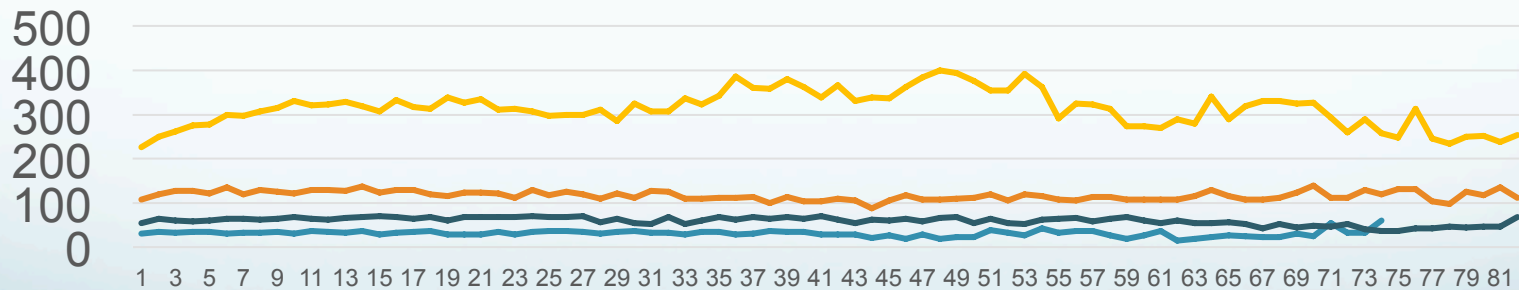

- For those working in jobs that are below the group average in terms of wages and hours, the ratio of work hours to job coaching hours is pretty consistently 1:1.
- For those working in jobs that are above the average in terms of wages and hours, the ratio of work hours to job coaching hours start out at close to 2:1 and increases to 3:1 at around the 2 year mark.

Hours worked and earnings for individuals with high support needs in individual jobs are relatively flat over time

Median hours worked per month - High acuity

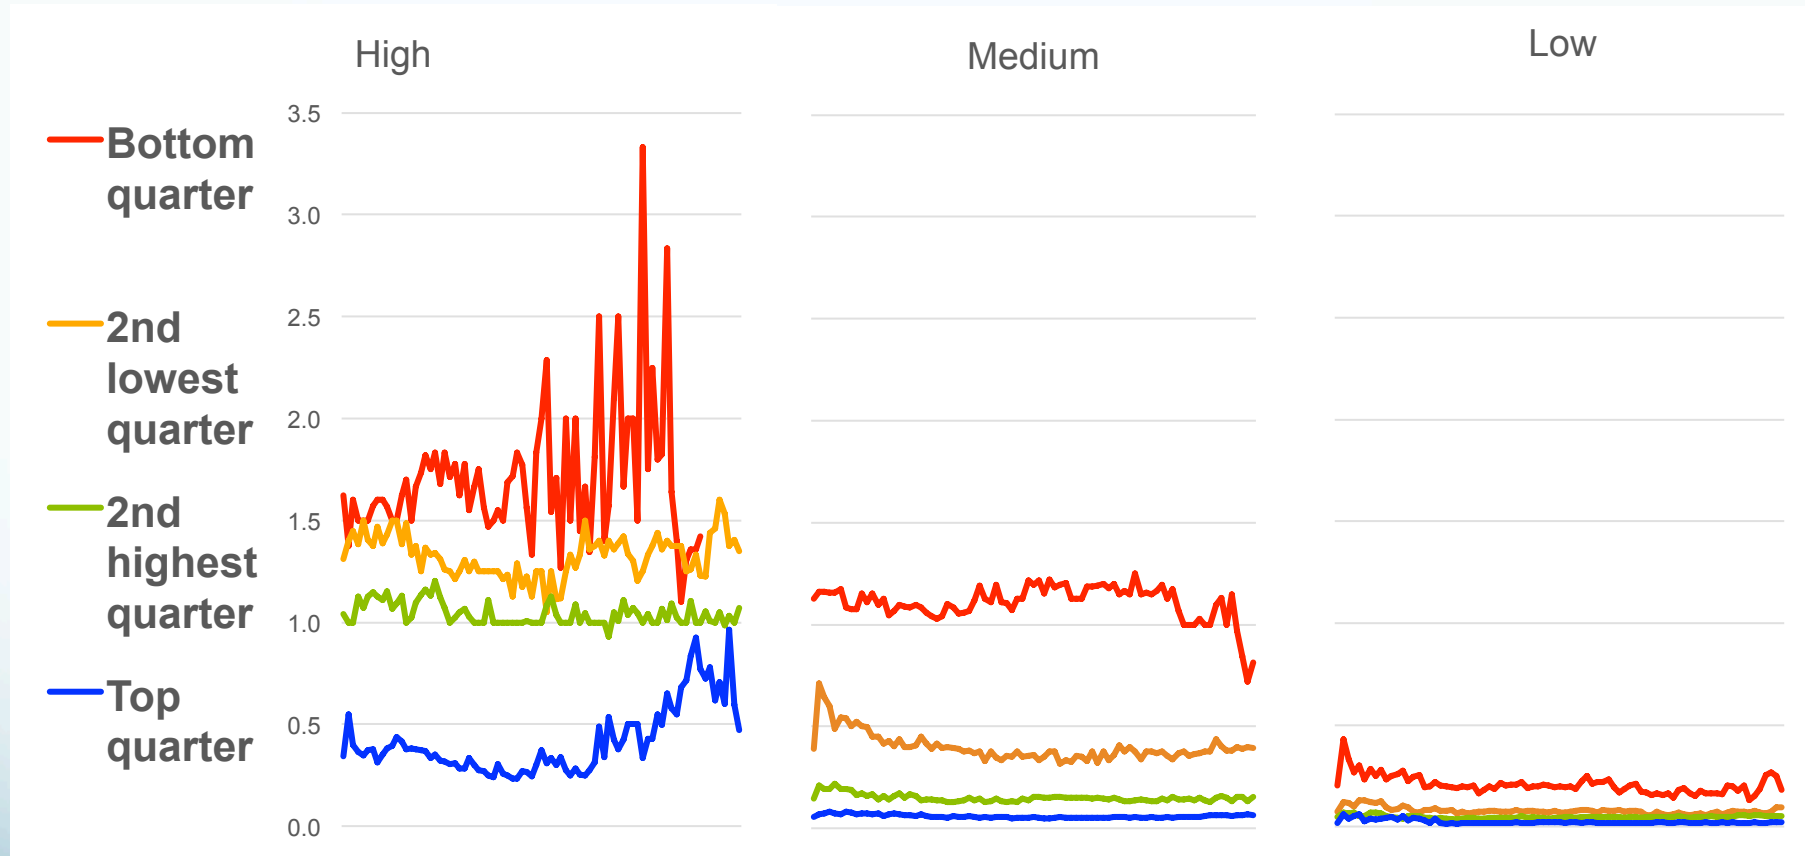

Median Gross Wages per month - High Acuity

— Bottom quarter — 2nd lowest quarter — 2nd highest quarter — Top quarter

The ratio of job coaching hours to hours worked by acuity reveal that “lower outcome” jobs are ones where more job coaching is provided

Month-by-month job coaching : hours worked ratio by acuity

Note: for each chart the x-axis ranges from month 1 to month 82

Priority areas for Employment Services

☞ **Transition Students Leaving High School**

Collaborate with school districts and related organizations to improve job readiness for graduating students.

☞ **High Acuity Clients**

Provide training to improve staff expertise of contracted employment provider agencies, DDA field service staff, county staff, families, self-advocates to support high acuity clients to be successful in increasing employment outcomes.

☞ **Minimum Wage or Better**

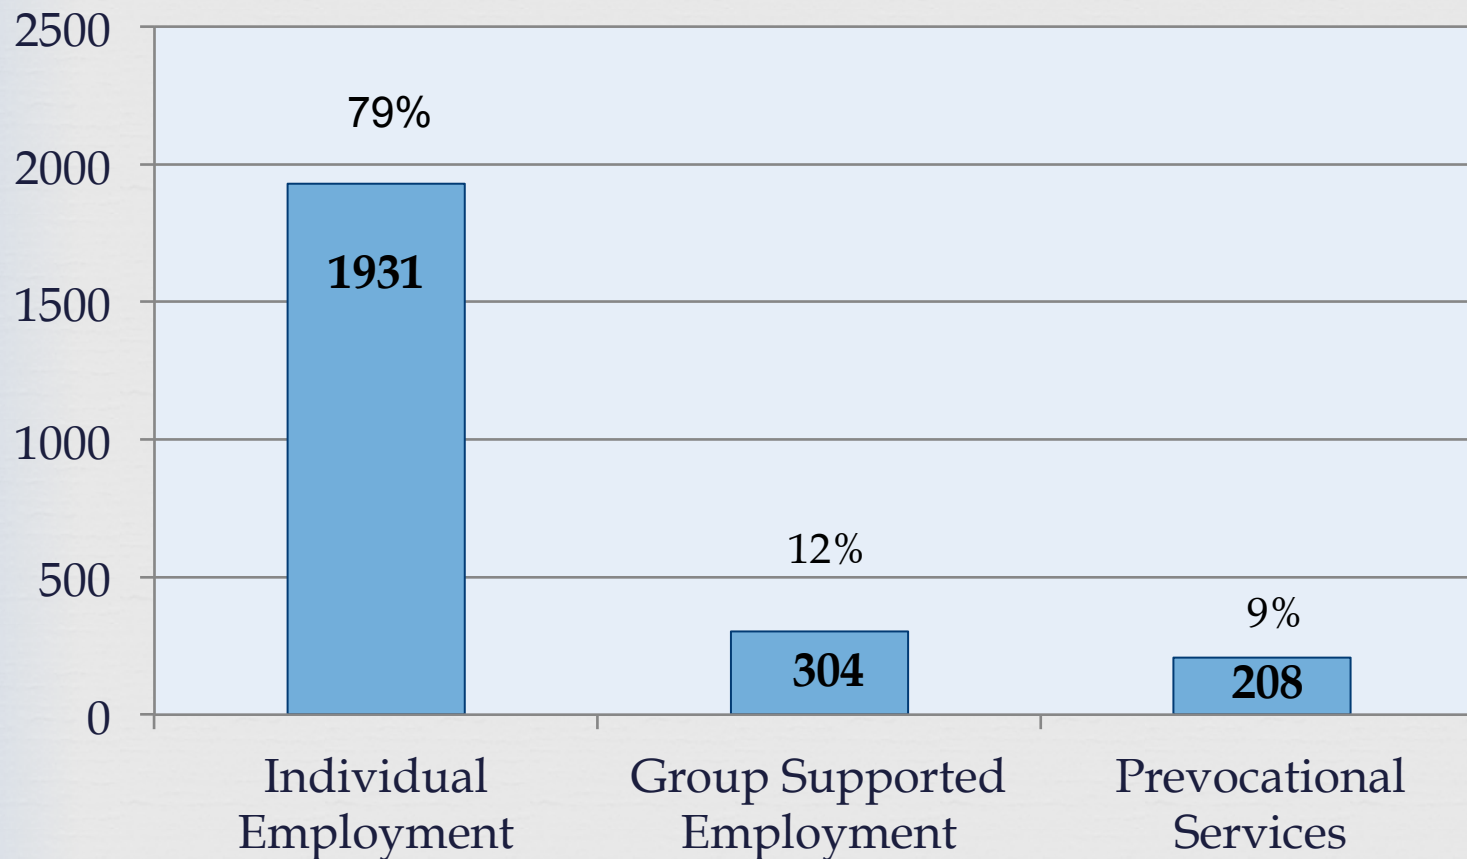

Provide technical assistance, training, tools, and reports to counties and providers in support to increase wages.

☞ **Prevocational Services Transformation**

Provide agency and individual technical assistance, training, and person-centered planning to Prevocational agencies and participants to successfully transform agencies into integrated employment models and smoothly transition participants into the appropriate integrated service.

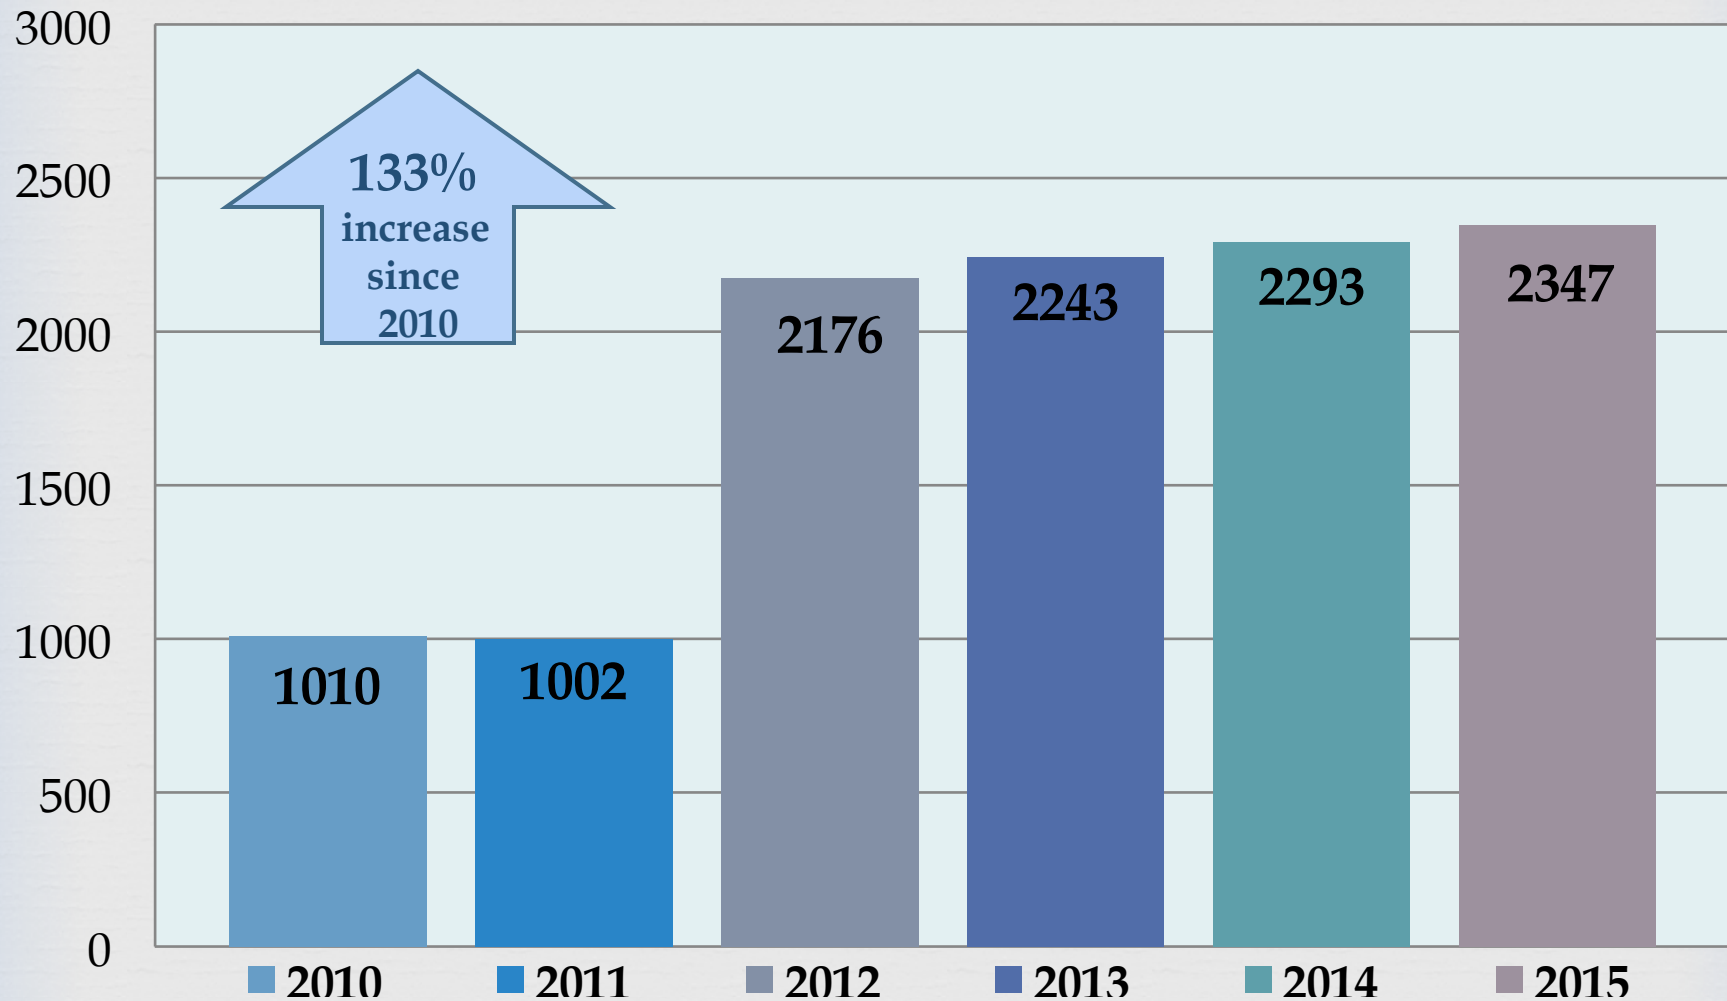

High Acuity Clients

Current employment service for high acuity clients:

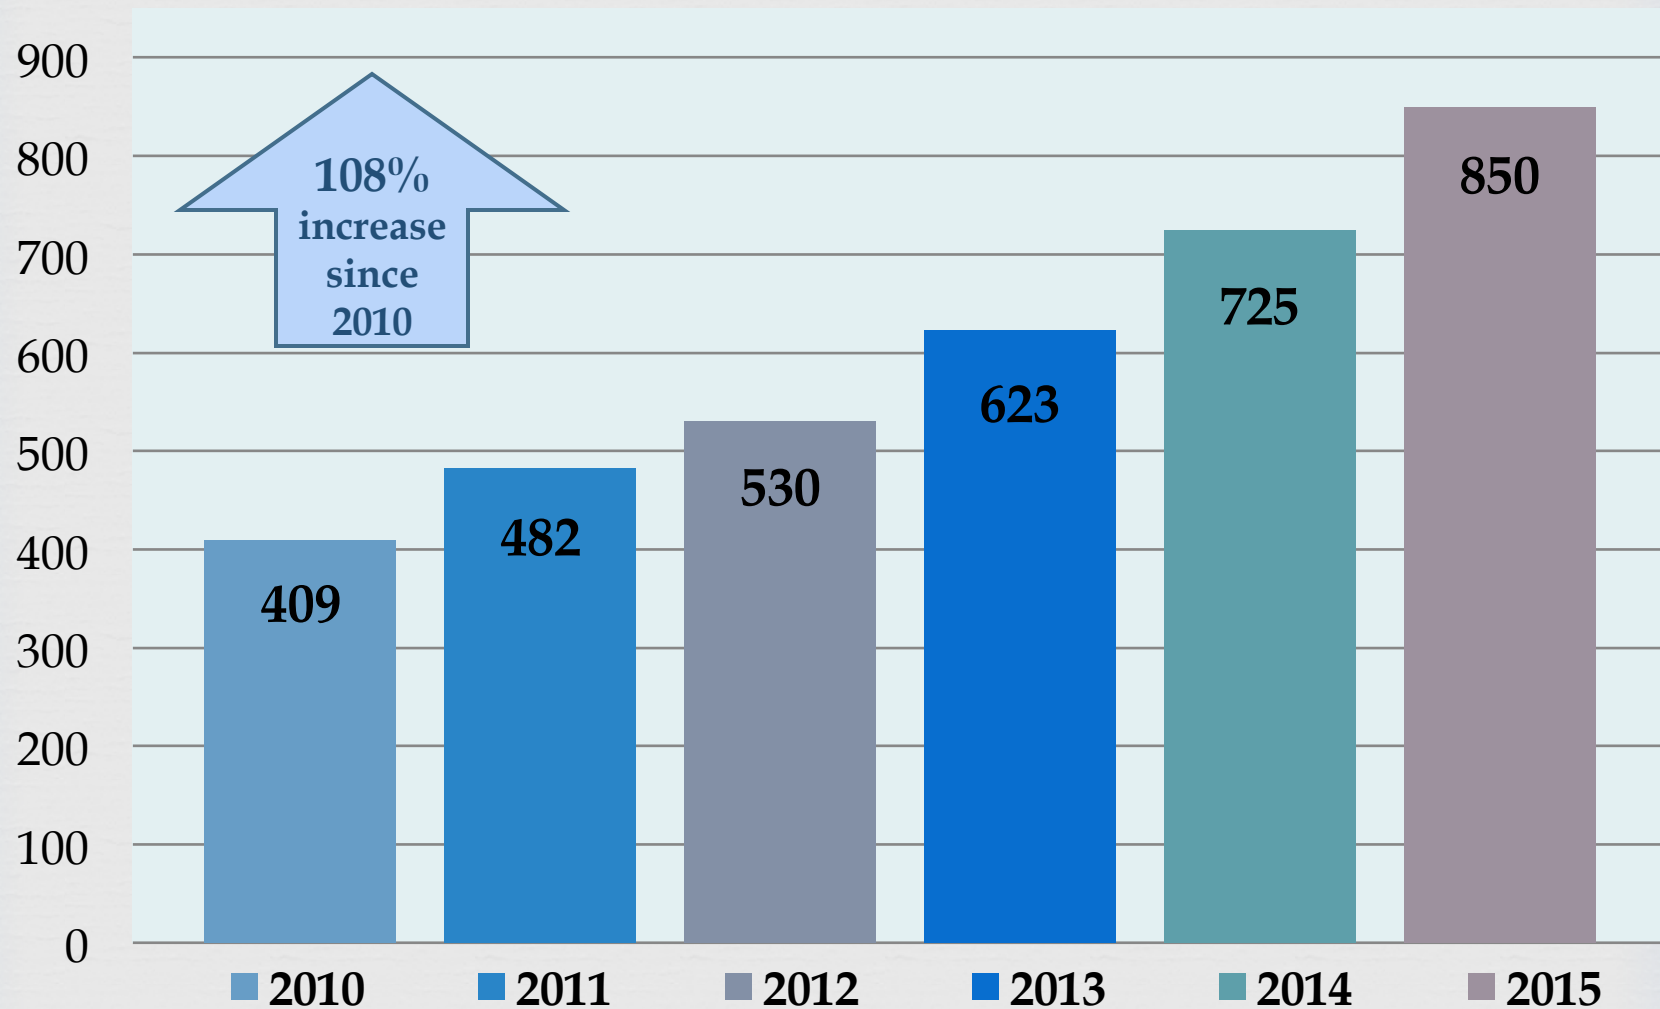

Data source – DSHS DDA CARE system, data pulled on 8.6.2015
