Recommendations

- Tracking Employment First Conversations**
DBHDS has worked to develop new measures as part of the CSB performance contract which specifically collects data on:
 - (1) discussing employment with individuals receiving case management services and
 - (2) developing individual goals increasing the number of individuals engaged in integrated opportunities.

Slide 10

Recommendations

- Maximize number and geographic distribution of respondents to ESO survey
- Focus on factors which show effectiveness of employment services (moving from workshop to work)
- Have more focus on transition students
- Set target for Employment Readiness/Related Goals then targets for % employed
- Make sure you have firm understanding of your numbers, people will use numbers for different purposes

Slide 12

Recommendations

- Have stakeholders involved from beginning
- This is not a evaluation, rather we all are trying to figure out where we are
- Clearly define what you want to learn from the data
