### NASDDDS Culture of Quality

- A NASDDDS member community of practice for quality in I/DD Services
- A technical assistance opportunity to explore and establish more integrated and holistic models of quality improvement, built on the foundation of current practice and in consideration of person-centered systems of support. It is the infusion of quality within and among a state's existing initiatives and priorities, establishing a specific framework for a strong culture of quality that moves away from exclusively defining quality as compliance with minimum standards.

### NASDDDS Culture of Quality

- The initiative focuses on the use of available data to anticipate system vulnerabilities, respond to data trends, and implement agile learning techniques in close collaboration with local agencies and direct service providers.
- Meets states where they are with quality assurance and improvement:
  - Operating at a basic compliance level
  - Focusing on standards with some elements of quality improvement
  - Advancing to promote the practice of quality at the state and local level
- The chief aim of the initiative is to build a culture where quality isn't seen as a stand-alone activity but rather is infused within and among a state's existing strategies and priorities.

## NASDDDS Culture of Quality

**STATE ACCOMPLISHMENTS**

- **Indiana:** Used the Model for Improvement and rapid cycle testing as part of COVID-19 pandemic responses; used continuous quality improvement concepts and tools to improve provider service reviews and service plan development processes
- **Tennessee:** Focused on using quality concepts and tools to improve risk assessment and critical incident management
- **Connecticut:** Engaged in rapid cycle testing and applied continuous quality improvement tools to the mortality reporting and review processes
- **Minnesota:** Conducted process mapping to identify opportunities to improve the incident management process and data collection

## NASDDDS Culture of Quality

**STATE PLANS**

- **Hawaii:** Engaging with the Culture of Quality to improve state I/DD agency quality practices and support the provider community to develop their own approaches to quality management aligned with state expectations
