

**SELN Data Users' Group Meeting
with
Maryland Colleagues:
Danielle Lyons and Jade Gingerich
June 2015**

Today's discussion

- ❖ Recognize how data efforts are driving decisions about “what is employment” and how to think about employment outcomes
- ❖ The importance of a shift from a service focus to an outcome focus
- ❖ How does job development fit in to outcome-based data reporting

Maryland's Goals

Help DDA and the community of stakeholders develop the supports and infrastructure necessary to fulfill the vision and goals of Maryland's Position Statement on Employment Services so that:

- ❖ More people are employed with better hours and earned income
- ❖ We know where we stand
- ❖ More people leave or reduce reliance on SSI
- ❖ Families and individuals are making informed choices

Basics

- | | |
|-------------|--|
| Who | Each person who receives DDA funded employment or day services |
| When | Twice each year (October & April/May) |
| What | 2 week snapshot of employment participation during the target month that can be customized |

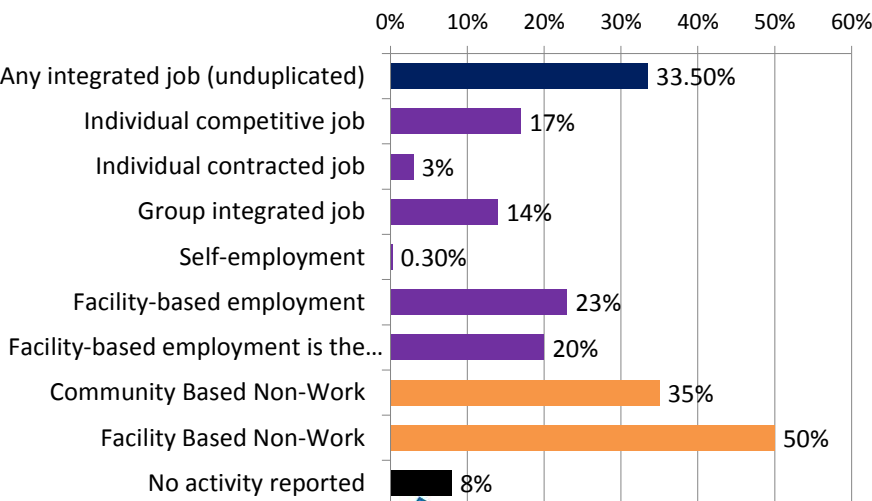

Participation, wages, and hours in:

- ❖ Individual competitive job
- ❖ Individual contracted job
- ❖ Group integrated job
- ❖ Self employment
- ❖ Facility based/Sheltered work
- ❖ Community based non work (yes/no only)
- ❖ Facility based non work (yes/not only)

Out of all people receiving services, what percentage participates in...

Summary of employment participation

Employment type	Number	Percent of all individuals	Mean hours worked/ 2 weeks*	Mean gross income/ 2 weeks*
individual job	2,053	17%	35	\$325
individual contracted job	357	3%	36	\$337
Group integrated job	1,667	14%	27	\$191
Self-employment	38	.3%	19	n/a
Facility-based Employment	2,673	23%	17	\$66
No activity reported	961	8%	n/a	n/a

Why this work is important

- ❖ Defining “what is employment”
- ❖ New discussions about employment outcomes
- ❖ Shifting from a service focus to an outcome focus

(Re)Defining Services

- ❖ “Job Development” in outcome-based data
 - Do you count hours?
 - What does it tell you?
- ❖ Thinking differently: “Is the person actively pursuing employment?”
- ❖ What about “Discovery”
- ❖ How this all relates to community-based non-work time

Data reporting issues

- ❖ No activity reported for many individuals
 - Individuals who do not work but participate in non-work activities need to be reported
 - Reason for no activity
- ❖ Outliers – wages and hours
 - Check your data if you see the warning

Supporting this Work and What's Next

- ❖ Possible new Q's for Fall 2015 data collection
- ❖ Managing the process
- ❖ What's next

Self-Employment Summary

- ❖ 38 reported participating
 - 38 reported income
 - 26 reported expenses
- ❖ Mean gross income for last 3 months: \$502**
- ❖ Mean gross expenses for last 3 months: \$327**
- ❖ Mean net income for last 3 months: \$175**
- ❖ Net income range: \$(-1161) to \$1050**

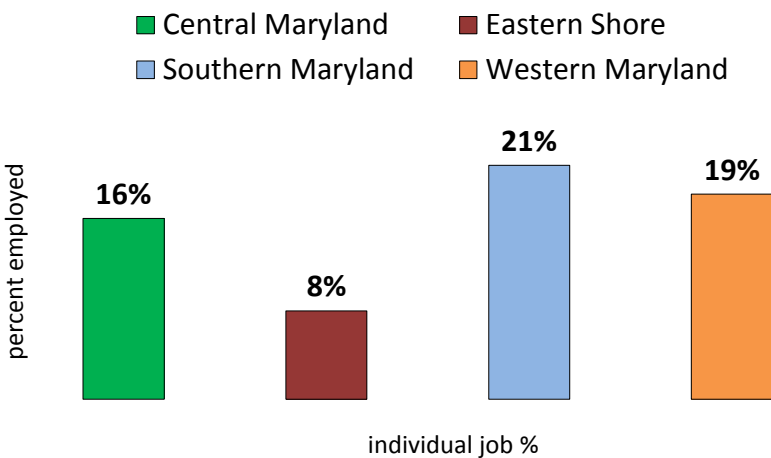

* **Excludes individuals with 0 hours reported for self-employment

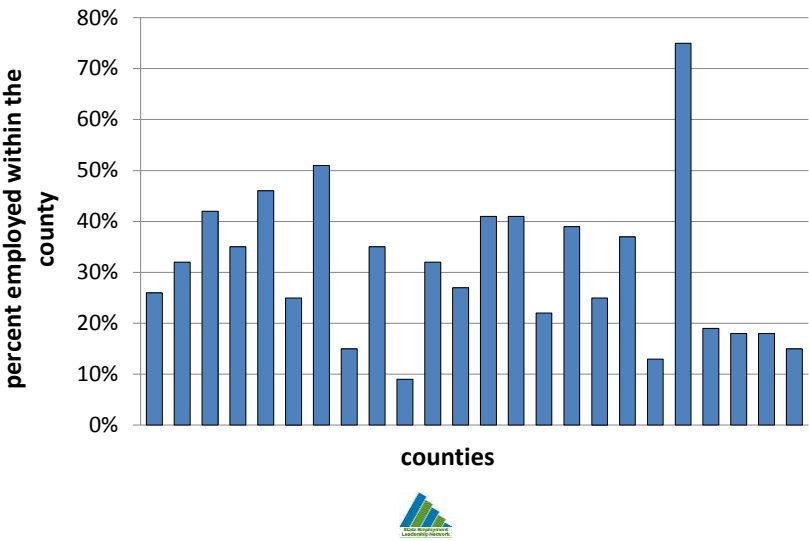

Distribution of any integrated jobs by region

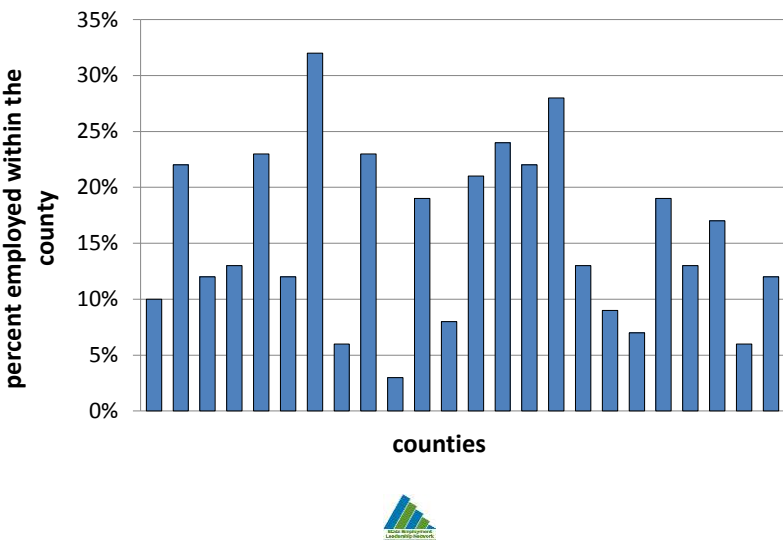

Distribution of individual jobs by region

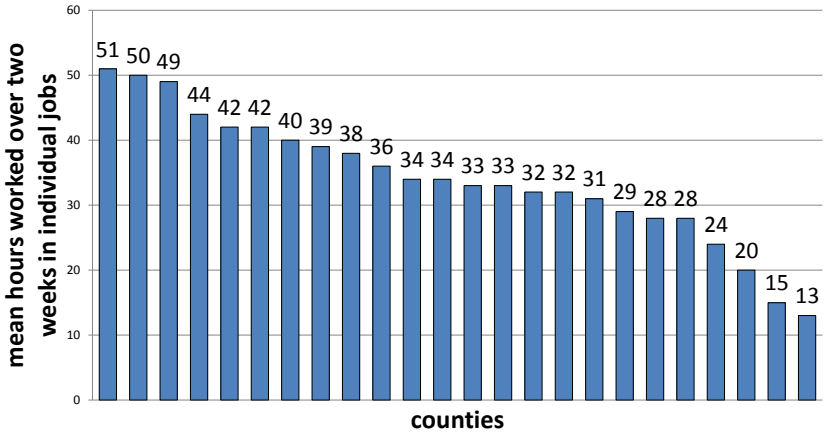

Distribution of any integrated jobs by county

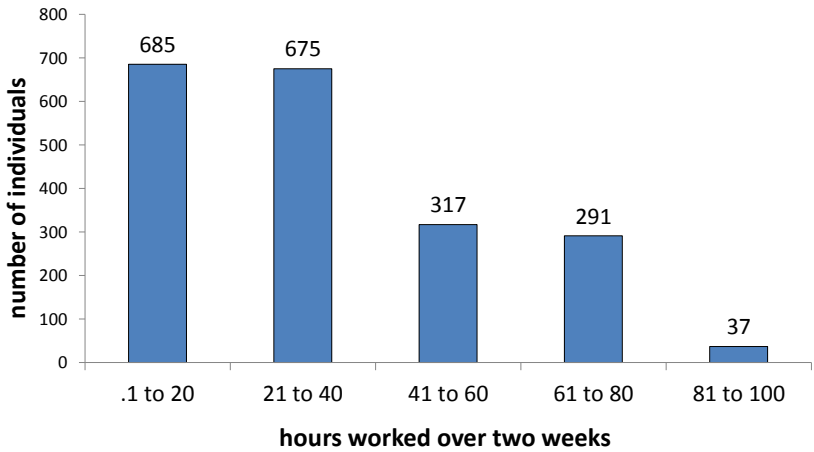

Distribution of any individual jobs by county

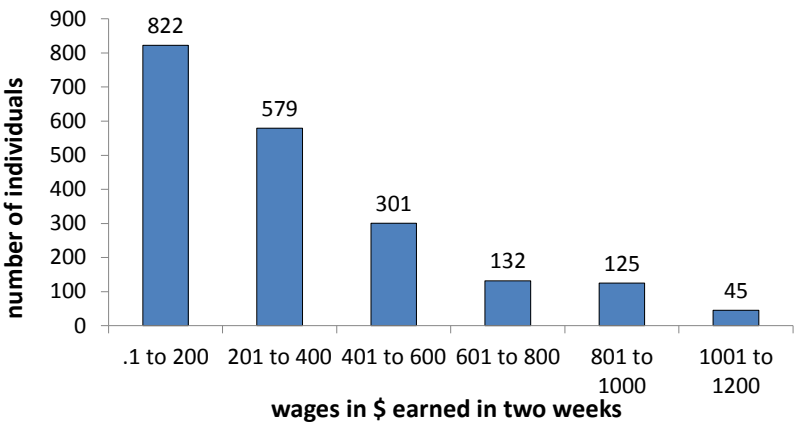

Mean hours worked in an individual competitive job over two weeks by county

Distribution of hours worked in an individual competitive job over two weeks across the state

Distribution of wages earned in an individual competitive job over two weeks across the state

Distribution of participation in employment by age group

Employment type	21 to 26	26 to 30	30 to 40	40 to 50	50+
individual job	19%	26%	21%	16%	9%
individual contracted job	4%	4%	3%	3%	2%
Group integrated job	11%	14%	16%	17%	13%
Self-employment	.1%	.1%	.1%	.1%	.1%
Total	100%	100%	100%	100%	100%

How many people who are working also participate in a non-work activity?

	% also participating in community-based non-work	% also participating in facility-based non-work
individual competitive job	25%	23%
individual contracted job	22%	20%
Group integrated job	27%	27%
Self-employment	32%	42%
Sheltered employment	30%	62%
